How to Fight the High Cost of Living

Cake Contest—Best Cake For Least Money Is What Standard Is Looking For—Recipe For One-Egg Cake Guaranteed To Be Delicious and Most Economical If Made According to Directions—Dinner Sets Offered as Prizes For Best Cakes—Third Prize Porcelain Coffee Set—Fourth Prize, Four-Pound Can Cottole—Cheapest Cooking Fat Almost as Good as Butter.

COTTOLENE CAKE CONTEST

The best cake for the least money is what the Standard is looking for. We are offering a number of prizes for the best cake made according to the following recipe. Of course, Cottole must be used.

One-Egg Cake.
One-third cup Cottole, one cup sugar, one egg, one teaspoon vanilla, one-half teaspoon soda, one teaspoon cream tartar, two cups flour, one cup milk.

The above recipe is said to be for the most economical cake that can be made, and be cake, if made according to the following directions:
Rub the Cottole and sugar to a light cream; add the well-beaten white of egg last. Bake in a shallow pan in a moderate oven about half an hour. Two level teaspoons of baking powder may be used instead of the soda and cream of tartar.

To the ladies that can bake the best cakes from the above recipe we will give:

First Prize—One set 35 pieces dinner set.

Second Prize—One dinner set of 35 pieces.

Third Prize—One porcelain percolator coffee pot, cream and sugar dish.

Fourth Prize—The first twenty-five paid up subscribers of the Standard that will apply at the Standard Business Office on or before May 31st and agree to make a cake according to the above recipe and exhibit it at the Standard office on June 7, 1913, will each receive free, one four-pound can of Cottole.

There you are, can you afford to try it? A real cake can be made for just about 15 cents and have the best of everything used in the cake. How many wives find it hard work and a drudgery to make a cake? How many cannot make a cake? If you want to make cake making a pleasure, get in on this contest. It costs nothing to get the four-pound can of Cottole free and try your luck. You can experiment several times and profit by experience before the exhibit takes place on Saturday, June 7th, at 3 o'clock.

CHEAPEST COOKING FAT

If cottole is 2 cents a pound cheaper than lard and when one pound of cottole goes as far as one and a third pounds of lard, why do people use lard? At present high prices, should people be advised on these matters? I think so. The manufacturers of cottole guarantee that three pounds of cottole will bring the same results as four pounds of lard. If that is true then 15 cents worth of cottole will bring the same results as 20 cents worth of lard.

Oh, but they say that cottole has a slight smell of the cotton seed oil. Yes, and lard has the smell of hog oil or lard. You have become familiar with the smell of hog oil. Just let an open bucket of lard and cottole stand in your cellar for a month and I wager that cottole will have the sweetest odor in the cellar. Why don't you tell your readers about the cheapness of cottole? I know it is good for all cooking purposes that lard is used for, and almost as good as butter.

—W. J.

RECIPES.

When Making Mayonnaise Dressing.
When making mayonnaise dressing use a revolving egg beater, and add the oil to the egg nearly a teaspoonful at a time until it is thick. After a time, should it separate, it can be made over by starting it over again, only adding another yolk to the curdled mixture, a teaspoonful at a time. With continuous beating this will become smooth and thick again. Nothing is better than sour cream added to make it thin.

STANDARD READER.

Method of Cleaning Feathers.

After seeing the following tried satisfactorily on over a hundred Knight Templars' feathers, when in a cleaning establishment in Chicago, I feel free to recommend it to clean feathers. To one quart of gasoline add one cup of flour. If the plumes are extremely dirty one will need to use two recipes. If the first use some good white soap, then the flour and gasoline. Hank out to dry. Shake out the flour and hold the plume over the steam of a teakettle to restore life. Finish by going over each fiber with the dull part of a knife. I have cleaned many dresses in the same way, using the same proportions of flour and gasoline. This is also good for blue and pink silk; also for summer dresses. In fact, it will clean anything except dark shades, like brown or black.

LAZINESS A MENACE TO BEAUTY

Lying in bed while the sun shines is contrary to nature's laws. Taking sufficient sleep is one thing, but lying in bed when your sleep is finished will have a tendency to numb your body and retard healthy circulation of the blood.

Eight hours' sleep is enough for any woman and six hours is enough for any man.

It is a mistake to remain in bed in the morning after you have awakened and taking breakfast in bed is fatal to the beauty of the figure. The muscles become semi-paralyzed if not awakened to movement.

The healthy person should get out of bed quickly upon awakening, start immediately to move about. A few moments of dumb bell exercise or bending will limber up the muscles quickly and give a youthfulness to the

body that electrifies the entire system.

You will notice that old people, if well rarely lie down during the day; if they take their "cat naps" they generally take them sitting. The reason is they know well lying down relaxes away their appetites, and slows them down generally.

There is no reason why people should not be as young as they want to be.

It is an absolute punishment to be obliged to eat in a sleeping room. A room that has a bed in it is no place for a meal; a change of atmosphere is positively necessary to health. The atmosphere of a bedroom, especially in the morning, is not pure. Hours of airing would be required before it would be the place in which to serve even a cup of tea. Breakfast in other than a sleeping room at all times.

How refreshing it is to a person who has been obliged by illness to remain in bed for any length of time to get into another room, if only for an hour or so. The weak become stronger by changing their bed from one room to another.

Persons who suffer from lung trouble should lie down as little as possible. Lying down, without relief of sitting posture or walking about a room, will clog the pulmonary circulation, and this often causes congestion of both lungs.

Alertness of mind comes quickly by alertness of body. Working girls who are obliged to sit hours at a time should walk to work if possible and walk while they are eating their luncheon. It would be better to take a sandwich and run out into the air to eat it than to sit down to a feast during luncheon hour.

Remember: The muscles, the blood and the body all sleep with the mind and must all be awakened together.

OF CORD COTTON.

Graceful and novel is this summer frock, made with an underskirt of plain net, covered with another of all-over lace. The waist closes at the front with small white crocheted buttons.

The jacket and skirt are of the white cotton material resembling Bedford cord. The skirt has a straight back panel and two draped side pieces, fastened together with buttons at each crossing. The collar and cash are made of figured chiffon, edged with copper colored messaline.

Simple New Remedy

Has Powerful Action

It seems strange to many people in order that the simple mixture of buckthorn bark, glycerine, etc., as compounded in Adler-I-Ka, has such a quick, powerful action. Our customers state that JUST A SINGLE DOSE usually relieves sour stomach, gas on the stomach and constipation so QUICKLY that it is really astonishing. Many say Adler-I-Ka is the best bowel and stomach remedy we ever sold. A. R. McIntyre, Drugs (Advertisement)

SALT LAKE

COAL SHORTAGE IS THREATENED

Salt Lake, May 26.—If the retail coal dealers of Salt Lake carry out a plan now under consideration, Salt Lake may suffer a temporary shortage of lump coal this summer on account of the new state law requiring the weighing of lump coal at the point of delivery which went into effect Saturday.

The Denver & Rio Grande railroad has notified Elias Woodruff, president of the Jordan Credit association, an organization of coal dealers, that the railroad will pay no attention to the new law and also if suit were brought

that the case would be carried to the state supreme court.

At a luncheon at the Commercial club Saturday the dealers began to lay ways and means of securing the enforcement of the law, which they hold means an aggregate of \$150,000 to \$200,000 a year to them.

The plan proposed and which it is said was informally agreed upon is to the effect that all dealers will refuse all cars of lump coal from the railroads unless the coal be weighed before delivery in accordance with the terms of the new law. At the same time orders to the producers will be continued.

It is estimated that approximately twenty cars of lump coal per day are brought into Salt Lake. The dealers are said to take the attitude that their refusal to accept the coal will eventually result in the tying up of a large amount of the rolling stock of the railroad. It is contended that the railroads will be forced to load the coal at its point of origin or become involved with the producers. In this way it is thought the roads will be forced to meet the terms of the law.

PENROSE TALKS ON WAR AND PEACE

Salt Lake, May 26.—As a sequel to Peace day services the previous Sunday, President Charles W. Penrose, speaking at services yesterday afternoon in the Tabernacle, said that while every effort should be made to bring about universal peace and that war was wrong, there were no reasons moral or religious why nations and people should not take up arms against oppressors.

"There is some talk of war now," he said. "I do not think it is imminent, but I think it is wise for a nation to be ready for defense. Armies and navies cost a lot of money but we must have them. I believe The Hague tribunal and the Peace society are doing great work, but we cannot disarm all nations. Give up our armies and navies, until all nations agree to it."

There should be an international congress or parliament to make laws for all the nations and which should be obeyed by all the nations. Supplementary to this congress there should be an international supreme court, which would hear disputes between nations. All nations should be ready to agree to a gradual disarmament.

"While I endorse what the Peace society is doing and I am a member of the organization, some of our friends in the society say that war is always wrong, that there is no excuse for it, moral, religious or otherwise. Is war always wrong? I do not think so. There are times when it is inevitable."

President Penrose went on to say that there could be no wrong in people taking up arms for their defense when arms were raised against them. He recalled the oppression of the colonies by Great Britain, how the crown made war and how the colonies resisted and "by the blood of heroes established our glorious nation, the United States. Washington and other heroes of revolutionary war were inspired of God and the men who wrote that instrument of freedom, the constitution of the United States, were inspired of God."

The speaker declared that scriptures and revelations indicated there would be wars, tempests and commotions before the end, in which the wicked would slay the wicked, but then would come the real peace—with God the supreme ruler.

Getting down to everyday life, President Penrose urged Latter-day Saints to maintain peace in their communities; not to have bickerings, and take their conflicts to the civil courts. Most of these disputes, he said, rose over selfish things and money matters, and he urged the church members to let the law decide the differences without carrying them to church or civil courts.

In conclusion he said: "We must be valiant for the truth but let us be tolerant of the views of others. Let us arbitrate our differences." At the beginning he spoke briefly of prayer, urging Latter-day Saints to make prayer not a mere muttering of words and movement of the lips but a spiritual communion with their God.

President Penrose conducted the services and was the only speaker. Charles Wilkens gave the invocation and the benediction was pronounced by Angus M. Cannon.

VICE INSTANCES TO BE PUT UP BY AUTHORITIES

Salt Lake, May 26.—The executive committee of the Utah Social Service society received yesterday afternoon at the Hotel Utah to gain as much information as possible during the coming week regarding conditions in lodging houses and to turn this data over to the county attorney so the latter may secure action by the police department, under the new injunction and abatement law, now in effect.

The action of the society was said to be in reality a test of the sincerity of the city administration, as the chief of police was quoted at yesterday's meeting as promising to get action on warding house cases this week. Rev. Ward Winter Reese expressed his opinions as to the sincerity of the administration.

"I cannot see that the city is working with us," he said, "and I have been led to believe by the mayor that there will be no prosecutions of the owners of houses where prostitution is practiced. The chief of police has been quoted as saying he would begin action in this matter this week. But is there any way to get from the chief some definite statement of what he intends to do?"

"MESSIAH" TREAT FOR CONVICTS IN PRISON

Salt Lake, May 26.—Although the "Messiah" under the direction of Squire Coop has been given before four highly appreciative audiences, perhaps the one most pleased was that of 217 prisoners at the state penitentiary which enjoyed the rendition of the sacred music yesterday morning. Every prisoner in the penitentiary was marched into the prison yard. There the "shut-ins" stood in four rows with bare heads just behind the dead line, while they listened to the sacred oratorio. Squire Coop, with his well trained chorus, with their performance in the southeast corner of the prison yard.

Deputy Warden A. C. Ure said that the entertainment was without doubt the best one that had ever been given at the prison and that the prisoners appreciated it as only those who have been shut out from the world for years.

Finding after the first appearance of his chorus at the Salt Lake theatre that there were still many who

WOMAN GAVE DESPERADOES KNIVES THAT THEY MIGHT ATTACK OFFICERS OF CHICAGO COURT IN DASH FOR LIBERTY IS CHARGE

Left to right: Peter Jensen, Garnette La Fairfield and Harry Evans.

A girl who calls herself Garnette La Fairfield is detained in a Chicago jail, charged with having plotted the escape of two desperate criminals from a Chicago courtroom. Sentence had just been pronounced on Harry Evans and Peter Jensen, the two criminals, when suddenly they attacked with knives officers and attendants of the court. The men were finally overpowered. It is said the girl, who is a sweetheart of one of the prisoners, stepped up to Evans while the jury were out and pressed her hands, which were enveloped in a handkerchief, on his hands, which were in his lap. This explains, it is believed, how the desperadoes got the weapons.

At the close of the performance Squire Coop was presented with a diamond pin and cuff links by Professor Ebaugh on behalf of the University of Utah Musical society.

The card encased with the handsome present read: "To Professor Squire Coop as a slight token of the esteem and affection in which he is held by the University Musical society."

A feature of the afternoon performance was the rendition of an encore to the soprano solo "Come Unto Him." Mrs. M. T. Browning's rendition had awakened the enthusiasm of the audience, and for the repeat the entire soprano forces of the chorus joined Mrs. Browning, and the work was done with a precision and effect that were remarkable.

STATE NEWS

MAYOR OF BOISE IS NOW ON TRIAL

Boise, Ida., May 25.—Mayor Arthur Hodges of this city is on trial in the district court charged with failure to perform the duties of his office and enforce the ordinance prohibiting immorality and the unauthorized sale of intoxicating liquors. In his answer to the complaint, Mayor Hodges denies knowledge of disreputable places of this character in Boise, declaring that as far as his knowledge is concerned, he is not commonly reputed that there is such a place as a restricted district in the city.

The case is one that has caused an upheaval in local municipal circles due to the fact that those behind the charges made against the mayor have invoked a provision of the general laws in an attempt to remove Mayor Hodges instead of acting on the recall provision of the commission form of government act under which Boise is now operating.

Mayor Hodges says he is confident of a complete vindication. The restricted district in this city has been for years a subject of municipal discussion and has caused every incommensurate trouble. It was closed at one time to the administration of Mayor Joseph Pence, who refused to permit the city to become a party to the traffic. At that time fines were being paid monthly into the municipal court.

PREPARATIONS MADE FOR MEMORIAL DAY

Provo, May 25.—Mayor C. F. Decker has announced that Memorial day will be fittingly observed by Provo and vicinity. Elaborate preparations are being made by the city commission, and every detail will be looked after with the utmost care. Chief of Police W. F. Giles will be officer of the day.

The gathering for the parade will take place at 9:30 a. m. in front of the postoffice corner, and the procession will march to the cemetery in the following order: Marshal of the day, Martial band, G. A. R. Relief corps, Indian war veterans, City band, city officials, mounted; fraternal orders, Sunday schools of all denominations, the public in general.

Prof. J. R. Boshard will be in charge of the music.

When the parade arrives at the cemetery an interesting programme will be carried out.

SHOCK CAUSED DEATH

Salt Lake City, May 25.—At the inquest held on the body of J. W. McKidding, the rancher who jumped into the Salmon river last week while suffering from hallucinations, the jury found that he had come to his death by means unknown to the jury. An examination made by two doctors revealed the curious fact that McKidding's death was not caused by drowning. It is generally believed that the shock from his leap into the icy-cold water killed him. The jury exonerated from all blame the two men who were in the rig with McKidding and who were bringing him to Salmon for proper care on account of his mentally deranged condition.

PROOF OF IT.

Daughter—But, papa, how can you say that Jack is extravagant? I'm sure he's very economical.

Daughter—How do you know?

Daughter—Why he never comes here an evening but that he turns down the gas.

SITUATION IN MEXICO

Mexico City, May 26.—The war department expressed the belief that before the end of the week the government will be in possession of Hermosillo, capital of Sonora, that much will be accomplished towards reopening the Mexican Central railway between Chihuahua and Torreon and that fair progress will be made in the campaign now being directed from Monterey. Rebel sympathizers, however, would not be surprised if when the week closes, the advantage would be on the side of the enemies of the government. The attack on Morelia, capital of Michoacan late Saturday was repulsed by the federals.

Rebels are still occupying positions near the towns, but the forwarding success is improbable. It is not considered likely that any state capitals now held by the government will fall into the hands of the rebels, who seem content to occupy the small towns in the rural districts.

It is regarded as more likely that they will continue their tactics of crippling the railroads and there is reason to believe their plan includes the isolation of the Mexican capital itself by cutting the two trunk lines just to the north and the two lines to Vera Cruz, one of which is owned by British capitalists. No dispatches were received yesterday from Monterrey nor Tampico. Eight hundred troops were dispatched from here to Tampico. Reports from rebel districts say the rebel ranks are rapidly being filled. The government, however, is also building up its army, many of the recruits being former prisoners until there are now more men under arms in Mexico than ever before.

The character of these recruits and their lack of discipline makes operations with small bodies almost impossible. The rebels are moving in small mobile bands, which have been active in the states of Jalisco and Hidalgo. They have also penetrated the federal district. A small government force was repulsed a few miles from the capital and rebels raided a ranch near San Angel, a suburb.

UNKNOWN PATIENT MAY BE ROTROM

Rochester, Minn., May 26.—That "J. C. R.," the unknown patient at the Rochester state hospital for the insane is Lieut. Rotrom is the belief of state hospital officials and was given credence by J. C. R., who enthusiastically indicated yesterday that his identity had been established.

The information came in a letter from Edward Vogt, a sailor of New York, N. Y., who claims that he was with Rotrom on the battleship New York and that both took part in the battle of Matanzas, Cuba, during the Spanish-American war, in which Rotrom received a number of wounds.

The information given by Vogt tallies closely with the story repeatedly told by J. C. R.

The hospital authorities will notify the navy department.

NICARAGUA AFTER CANAL

Washington, May 26.—Another great Atlantic-Pacific waterway, making a ship route between the eastern and western coasts of the United States two thousand miles shorter than through the Panama canal will be built soon by the United States in the opinion of Dr. Salvadoro Castillo, retiring Nicaraguan minister. Castillo declared in a statement last night that he believed a canal treaty would be negotiated between the United States and Nicaragua and that a canal would be constructed across his country. The canal treaty was negotiated by Minister Weitzel last winter and has received the approval of the Nicaraguan government. By its terms Nicaragua for \$5,000,000 would grant the United States the exclusive right to construct a canal across Nicaragua by way of the San Juan river and take Nicaragua. This govern-
